Professional Summary

Data Analyst with 2+ years of experience turning **Raw Data into Business Intelligence**. Builds **Data Models and Automated ETL Pipelines** with **SQL, Python and PySpark**, defines **Data Quality Metrics**, and delivers visualizations in **Power BI and Tableau**, working across **Snowflake and SQL Server** environments in pharma, healthcare and sports analytics.

Experience

Scholar Athletes Sports Network Sep 2026 – Present
Sports Data Analyst (Internship) *Washington, DC (Remote)*

- Audited **data sources** for 30 DMV high school football and soccer programs on the Sports Intelligence team, flagging 16 broken or outdated official websites and conflicting coach records at 11 schools.
- Helped design the **data pipeline** for the new Coaches Connection tool, from coach submissions through verification to content, defining submission fields, **ID standards** and **data-quality checks**.
- Building **Python** scripts (**pandas, openpyxl**) that load weekly game results into **Excel** workbooks and update standings and player metrics automatically; validating data in **SQL** for duplicates, missing fields and inconsistent stats.
- Turning weekly trends into story pitches for the DMV Gridiron and Live From The Pitch brands.

P360 Solutions May 2022 – May 2024
Software Engineer (Data Analyst) *Mumbai, India*

- Built **Power BI** dashboards for **Pharmaceutical commercial data** and software metrics, driving a 20% gain in system efficiency.
- Automated reporting in **SQL Server**, turning raw **Life Sciences** system logs into structured datasets and cutting manual reporting by 30%.
- Defined **Healthcare Data Quality Metrics** with 3 departments, using **Azure DevOps** to resolve 95% of data issues pre-production.
- Designed **SQL** data models for enterprise **Pharma applications**, improving data retrieval speeds by 25%.

Tejgyan Global Foundation (Supported by TCS) Jan 2021 – Sep 2021
Software Engineering Intern (Data & Mobile) *Remote*

- Architected **SQLite** data sync for mobile metadata and managed API integrations for content delivery.

A1 Robotics and Automation May 2020 – Jun 2020
Web Development Intern (Infrastructure) *Remote*

- Engineered full-stack infrastructure and managed **DNS/Zoho Mail** migrations with **100% data integrity**.

Education

George Mason University August 2024 – May 2026
MS in Data Analytics Engineering (GPA: 3.93) *Fairfax, VA*

Yeshwantrao Chavan College of Engineering June 2018 – June 2022
BS in Computer Technology (CGPA: 8.86/10) *Maharashtra, India*

Projects

Pearmund Cellars: Production Strategy & Forecasting | *Python, SQL, Time-Series* Jan 2026 – May 2026

- Performed **Exploratory Data Analysis (EDA)** on historical wine production data to identify seasonal trends, supply chain bottlenecks and production variances.
- Built **SARIMA** forecasting models to guide inventory and production scheduling, translating results into **Actionable Business Insights** for stakeholders.

Financial Risk Analytics | *Power BI, SQL Server, ETL*

- Architected **ETL pipelines** via **Power BI Dataflows** to process 1M+ financial records, implementing a **Relational Data Model** in SQL Server for YoY **Time-Series Analysis** and reporting.

Healthcare Intelligence | *Snowflake, SQL, Data Warehousing*

- Built a high-performance **Clinical Dashboard** in **Snowflake** using **Complex Joins** and **Window Functions**; implemented **Data Validation** scripts to ensure 100% consistency across electronic health records.

Technical Skills

Analytics & Tools: Power BI, Tableau, Git, Jira, Azure DevOps, Agile Methodology
Data Engineering: ETL/ELT, Data Pipelines, Data Modeling, Data Warehousing, Medallion Architecture
Languages: SQL, Python, R, PySpark
Cloud & Databases: Azure (Data Factory, Synapse), Snowflake, MS SQL Server, MySQL, Databricks
Certifications: Azure Data Fundamentals, Azure AI Fundamentals, AWS Academy Data Engineering
